

TAMIMI Industrial Services

A Tamimi Group Company

Who We Are?

We at **Tamimi Industrial Services (TIS)** are a leading Integrated General Construction, Fabrication & Maintenance Company providing innovative, cost-effective and sustainable solutions for Plant Construction and Operational Support. Being a highly diversified service provider, we at TIS strive in delivering professional services in a safe environment, focusing on quality, alongside a strong adherence to the timeline & schedule. TIS proudly personifies the expression of being a "one-stop-shop" for our valued clients by providing multi-discipline services under one roof.

SECTORS OF BUSINESS OPERATION

TAMIMI industrial Services (TIS) are currently operating throughout the Kingdom of Saudi Arabia and the neighboring GCC Countries. Our key target sectors whereby we can provide the utmost quality services are:

Within the above Key Market segments, **TAMIMI Industrial Services** are able to provide a wide range of diversified services focusing on quality centric solutions to be able to provide an efficient and smooth undertaking of projects. Listed below are our Core interconnected services being actively provided with details to follow:

1. Shutdown & LSTK Turnaround Maintenance
2. Valve Testing, Calibration & Repair/Maintenance Services
3. Fabrication & Maintenance of Tanks including Bottom & Shell Plates Replacement
4. Design, Supply, Fabrication of Heat Exchangers & Re-Tubing Work.
5. All Types of Catalyst Change Out, Cleaning & Hydro-jetting Services.
6. Fabrication of Modular Skids & Pipe Racks including complete interconnecting Piping, Valves, E&I.
7. Automated & Manual Shop Fabrication of Pipe Spools & Pipe Supports (CS, SS, AS, Duplex, Super Duplex, Inconel etc.)
8. General Construction covering installation of Piping, Steel Structure, Stationary & Rotary Equipment etc

OUR CORE SERVICES

- SHUTDOWN, LSTK TURNAROUND & MAINTENANCE

TAMIMI Industrial Services (TIS) have a dedicated Plant Services Division, offering Turnkey Shutdown, Turnaround and maintenance services throughout the region for all your electro-mechanical needs. Incorporated within this key division of ours, we are additionally able to provide:

1. Complete Valve Services (Repair, Maintenance Testing, Calibration, removal, re-installation)
2. Specialized Services (Catalyst Loading/Un-Loading, Super Sucker Services & Hydro jetting Services) to ensure a seamless execution and ensure a timely completion collectively whilst undertaking such projects.

By providing these “multi-discipline” services under our own umbrella, we are able to further control the Site and ensure it does not get away from us. This is a pivotal reason we at TIS decided to diversify and expand our services such as the aforementioned Valve & Specialized services but also incorporate and develop a dedicated Tank & Heat Exchanger services so that we may take control of the limited time during a shutdown and streamline the overall key activities to provide the utmost comprehensive experience for our clients.

- VALVE TESTING, CALIBRATION & REPAIR/MAINTENANCE SERVICES

A key addition to our diversification is the Valve Services that we are providing. This segment within our core services arsenal was introduced to initially satisfy the market demand for valve services requirements emerging throughout the market ranging:

1. Testing (Control Valves, PSVs & Manual Valves)
2. Servicing (Mechanical Valves, Control Valves & PSVs, Butterfly, Safety Relief etc.)
3. Calibration
4. Overhauling, repair, machining and maintenance of valves

Upon establishing the expertise and honing our skills and capability, we wanted to further cater the market by providing innovative and efficient solutions for our clients. This led to us introducing our containerized "Mobile Valve Shop". This is a self-sufficient workshop encompassed within a container that can be placed on site providing complete:

- Testing and Calibration for PSV (1/2" - 16")
- Breather Valve (1/2" - 24")

This set up not only decreases down time on site but maximizes the efficiency and productivity especially during Shutdown and Turnarounds.

- TANK INSPECTION & REPAIR SERVICES

Another integral component of our services is the development of our Tank Inspection & Repair teams. Besides just providing Tank fabrication services initially, we at TIS further developed our teams to encompass and comprehend the criticality of tank maintenance especially during limited time frames. From bottom plate replacement to floating roof and tank shell configuration repairs, our teams are able to provide effective and efficient solutions and execute them in a manner that satisfies our clients needs.

- CATALYST CHANGE OUT, CLEANING & HYDRO-JETTING SERVICES

To further compliment and support our overall Shutdown and Turnaround activities we further expanded our Specialized Services line. We have enlisted the support and formed alliances with international partners to be able to provide the utmost technologically advanced and class leading solutions to cater to the market.

- AUTOMATED PIPE SPOOL FABRICATION FACILITIES

One of our most proud accomplishments at TIS is our Pipe Spool Fabrication services and facilities. We are currently able to provide some of the most advanced Pipe Spool Fabrication services utilizing fully automated machines from cutting, beveling and welding (2"-78") specializing in CS, SS & all alloys. By utilizing the automated machines & technology alongside our manual welding techniques, we are able to provide an extremely high level of quality and assurance to our final products for our clients.

Our fabrication services are further complimented with our own inhouse approved NDT bunker and subsequently complimented with our own Blasting & Painting bays allowing for a complete smooth process from start to finish.

The Fabrication facilities greatly support our pre-shutdown activities whereby we are able to fabricate components for the upcoming TAs and ensure a timely commencement once the TA begins without having to rely on subcontractors to provide the fabrication of components.

- QHSE

In this day and age, we are nothing without our Safety and Quality Standards. TAMIMI Industrial Services (TIS) has a very stringent adherence to this concern and we take the Safety of our employees above anything very seriously as we consider them our most valuable assets. TIS is an accredited organization holding multiple certificates and authorizations as listed below:

ISO 45001:2018
ASME - PP VR Stamp

ISO 14001:2015
ASME - S T/O Stamp

ISO 9001:2015
ASME - U R Stamp
